

PRE-ARRIVAL SHIP'S INFORMATION

VESSEL:	Eta:
Vessel pressure relief valve set point (mm wc/ mbar)	value
Vessel vacuum relief valve set point (mm wc/ mbar)	value
Vessel vapour header <u>pressure drop</u> (mm wc/ mbar) (pressure difference between cargo tanks and vapour manifold)	value
List of last three products loaded:	products
Vessel inerting conditions at berth (O2 < 5% Vol. – press. < 400 mm wc requested)	
If vessel equipped with VOC (Vessel overfill connector) pls state following characteristics: max capacitance and max inductance.	value
Vessel vapour manifold size	value
Vessel vapour manifold position vs liquid cargo manifolds and distance from FWD cargo manifold (vapour connection must be located FWD of cargo manifold for BETA PIER and AFT for GAMMA PIER)	
Vessel midship crane availability (vapour hose connection)	
Vessel confirm main vapour line is dry (cargo/water free and low point drain tested)
